

Enterprise AI & Information Security Policy (Page 1)

Company Overview

NovaTech Analytics is a fictional enterprise providing AI-powered analytics solutions for finance, healthcare, retail, and manufacturing. The company values innovation, customer trust, security, and responsible AI. Employees must comply with company policies when handling customer or internal information.

AI Usage Policy

Employees may use approved generative AI tools for drafting documents, summarizing reports, and software development assistance. Confidential customer information, source code, credentials, and personally identifiable information (PII) must never be uploaded into public AI tools. Any production AI solution must undergo security review before deployment.

Password & Authentication

Passwords must contain at least 12 characters including uppercase, lowercase, numbers, and special characters. Passwords must be changed every 90 days and must never be shared. Multi-factor authentication (MFA) is mandatory for all enterprise systems.

Data Classification

Information is classified as Public, Internal, Confidential, and Restricted. Confidential and Restricted information must be encrypted at rest and during transmission.

Enterprise AI & Information Security Policy (Page 2)

Remote Work

Employees may work remotely up to three days per week with manager approval. Only company-managed devices may access corporate resources. Public Wi-Fi may be used only with the corporate VPN enabled.

Incident Reporting

Security incidents including phishing, malware, lost devices, or unauthorized access must be reported to the Security Operations Team within 24 hours. Evidence should be preserved where possible.

Travel & Leave

Business travel requires prior approval. Economy airfare is the default unless executive approval is granted. Employees receive 24 days of annual leave plus company holidays.

IT Support

Software installation requests must be submitted through the IT service portal. Hardware issues should be reported to the IT Help Desk.

Compliance

Annual security awareness training is mandatory. Violations of these policies may result in disciplinary action, including revocation of system access.
